

# AVIATION NOISE

We currently provide aviation noise consulting services to the Port Authority of New York and New Jersey, the New York City Economic Development Corporation, and more than 20 other international, regional, and general aviation facilities operators.

## Services

- FAR Part 150 and 161 Noise Studies
- Noise Modeling including: Aviation Environmental Design Tool (AEDT)
- Off-airport Land Use Compatibility
- Aviation Planning
- Noise Mitigation Programs including Sound Insulation
- Aircraft Noise Monitoring
- Helicopter Noise Studies
- Noise Barrier Evaluation

ESA Airports has provided noise consulting services to airports, heliports, regional planning agencies, states, and counties for more than 40 years. We have prepared noise analysis associated with NEPA and state environmental documents along with a variety of technical studies and evaluations in support of airport development programs, including numerous Federal Aviation Regulations (FAR) Part 150 and 161 noise studies. Our goal is to assist airports, heliports, and other stakeholders in balancing noise and environmental issues with the demand for expanded facilities and operations.

We have managed numerous FAR Part 150 studies throughout the United States and offer a staff with extensive experience in all facets of aircraft noise analysis, aircraft noise abatement procedures, sound insulation programs, and off-airport land use compatibility planning. Our studies provide aviation facility users and local governments with the opportunity to work together to guide development in a manner that enhances compatibility between the facilities and its neighbors.

Known for our efficient and quality work, built on sound technical analysis and informative and accurate documentation, we serve our clients with a staff of creative, dedicated, and experienced noise specialists capable of complex analysis, modeling, problem-solving, effective community outreach, and noise document preparation.
